

Lab Goal : The lab was designed to teach you more about parameters and to allow you to review input.

Lab Description : Take a word and a number of times to display that word. Then, write a method that takes in the word and times to display as parameters and displays the word that number of times.

Sample Input :

```
hello 9
funny 6
chicken 4
dog 1
cat 2
```

Files Needed ::

```
WordPrinter.java
Lab03b.java
```

Sample Output :

```
Enter the word to display :: hello
Enter the times to display :: 9
hello
hello
hello
hello
hello
hello
hello
hello
hello
hello
hello
```

Do you want to enter more sample input? y

```
Enter the word to display :: funny
Enter the times to display :: 6
funny
funny
funny
funny
funny
funny
```

Do you want to enter more sample input? y

```
Enter the word to display :: chicken
Enter the times to display :: 4
chicken
chicken
chicken
chicken
```

Do you want to enter more sample input? y

```
Enter the word to display :: dog
Enter the times to display :: 1
dog
```

Do you want to enter more sample input? y

```
Enter the word to display :: cat
Enter the times to display :: 2
cat
cat
```

Do you want to enter more sample input? n
