

```

public class ListNode implements Linkable
{
    private Comparable listNodeValue;
    private ListNode nextListNode;

    public ListNode()
    {
        listNodeValue = null;
        nextListNode = null;
    }

    public ListNode(Comparable value, ListNode next)
    {
        listNodeValue=value;
        nextListNode=next;
    }

    public Comparable getValue()
    {
        return listNodeValue;
    }

    public ListNode getNext()
    {
        return nextListNode;
    }

    public void setValue(Comparable value)
    {
        listNodeValue = value;
    }

    public void setNext(Linkable next)
    {
        nextListNode = (ListNode)next;
    }
}

```

```

public interface Linkable
{
    Comparable getValue();
    Linkable getNext();
    void setNext(Linkable next);
    void setValue(Comparable value);
}

```
